QUESTION # 1

When was Google Slides
renamed?

FUNCTIONS AND APPLICATIONS

Presentation Creation

- ★ Used to create, edit, and organize slides containing text, images, charts, videos, and other media.

Visual Communication

- ★ Helps present information clearly using layouts, designs, animations, transitions, and visual aids.

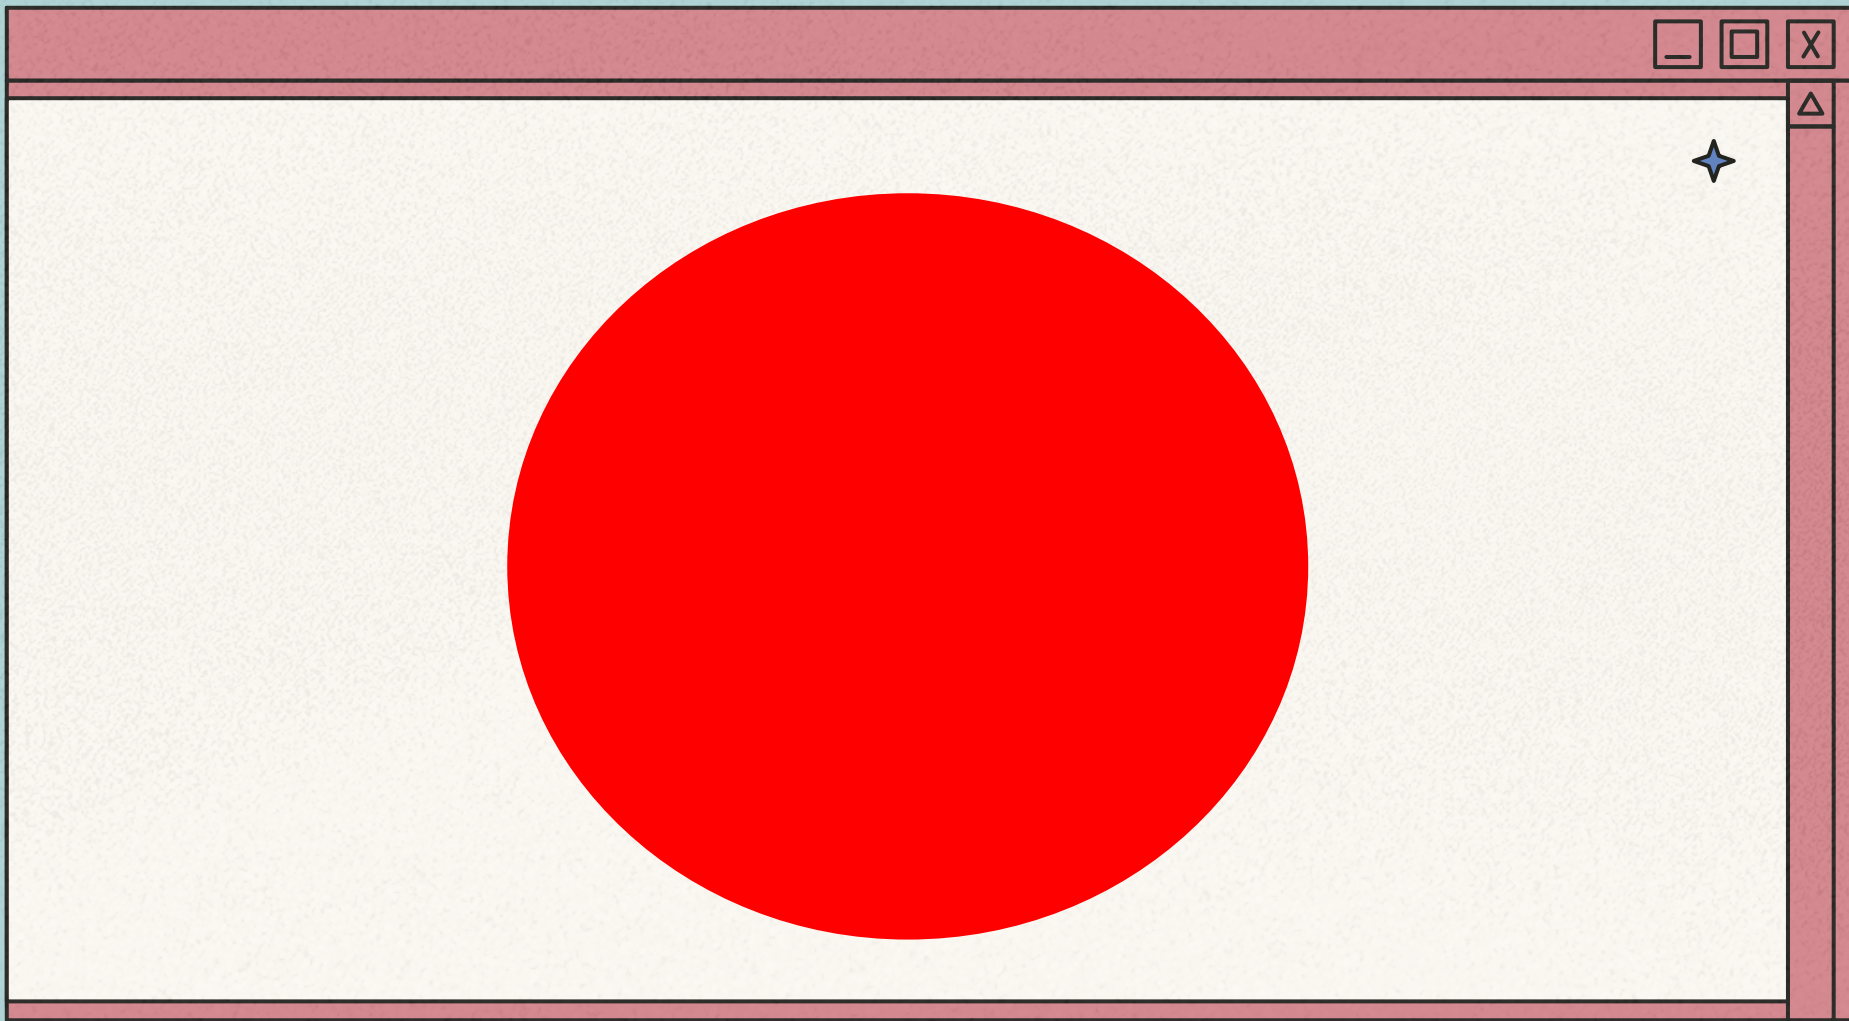

Collaboration

- ★ Allows multiple users to work on the same presentation at the same time, making group work easier.

Information Sharing

- ★ Helps communicate ideas, facts, and important information to an audience in an organized format.

QUESTION # 2

**What are the functions
of Google Slides?**

Education

- ★ Creating lectures, classroom presentation, interactive learning materials, student reports, group projects, and visual study guides.

Event Presentations

- ★ Organizers can use Google Slides for programs, schedules, announcements, or visual presentations during events.

Community Development

- ★ Presenting community needs assessments, disaster-preparedness plans, development projects, and public-awareness campaigns.

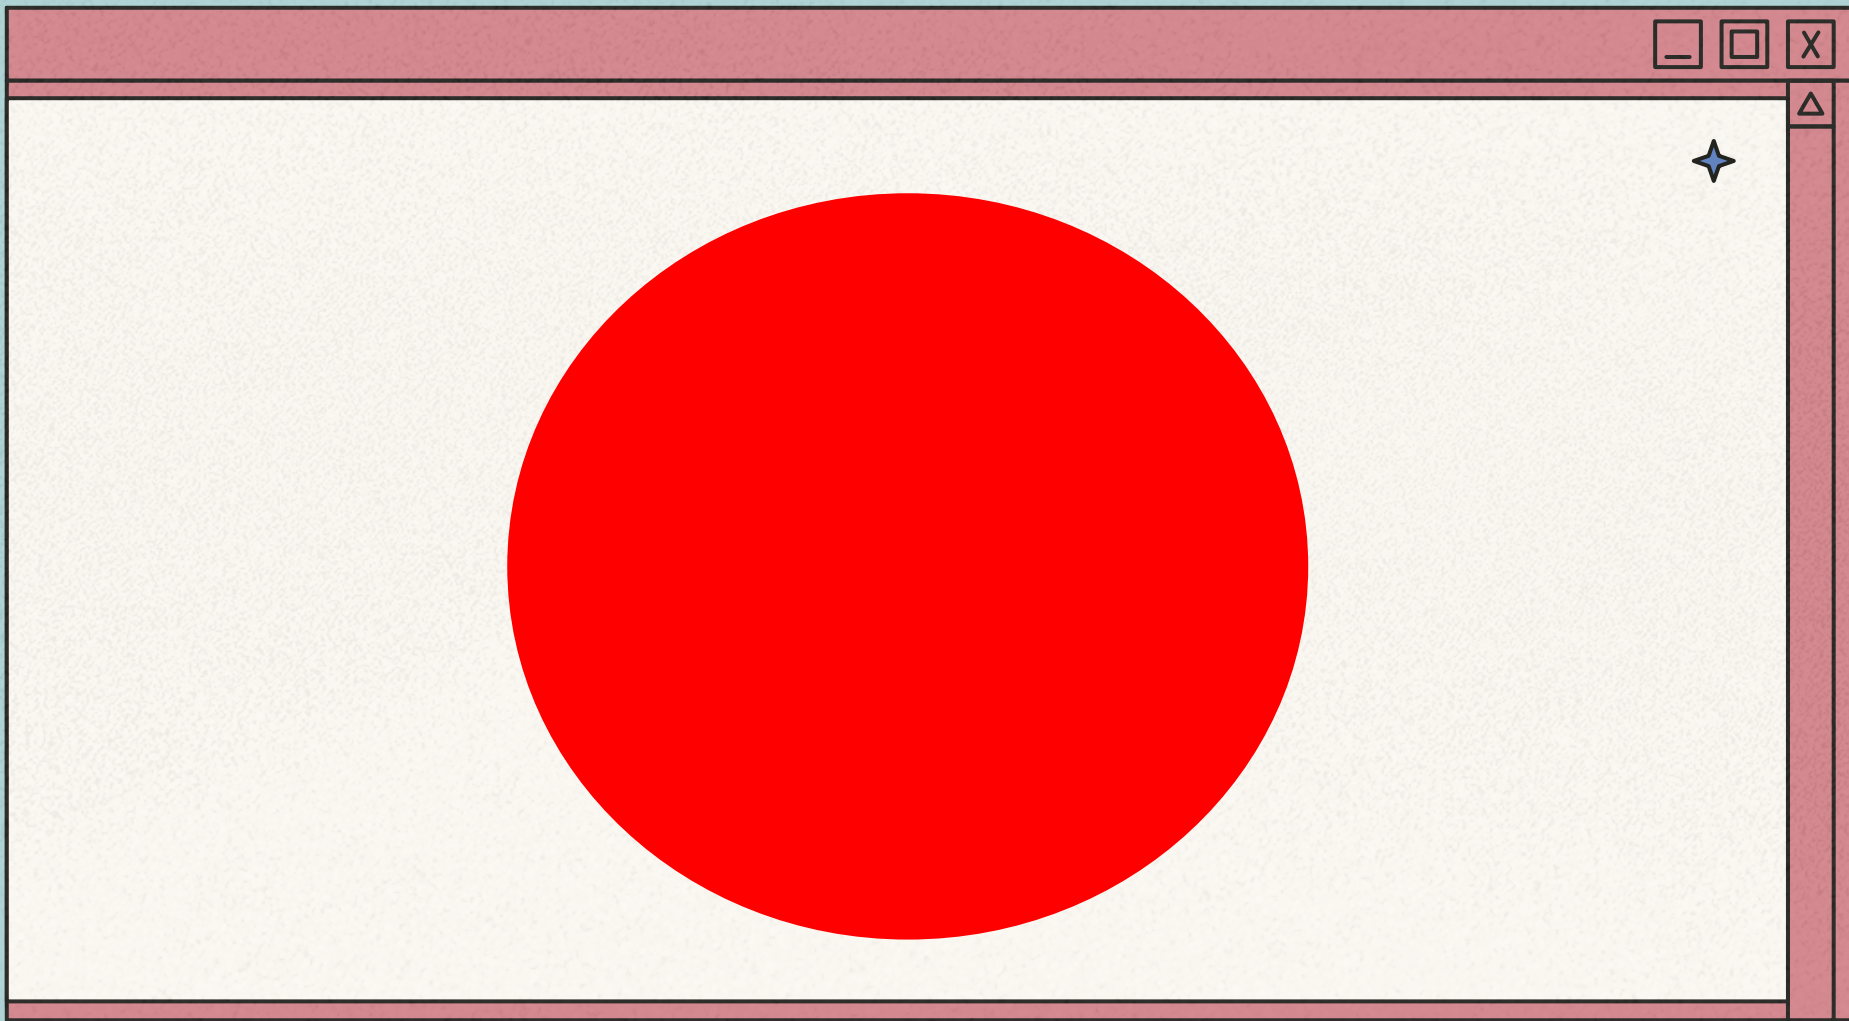

QUESTION # 3

An organizer needs to display event schedules, live announcements, and program flows on screens during a conference. Which specific category of Google Slides applications does this scenario describe?

- A. Event Presentation
- B. Community Development
- C. Education

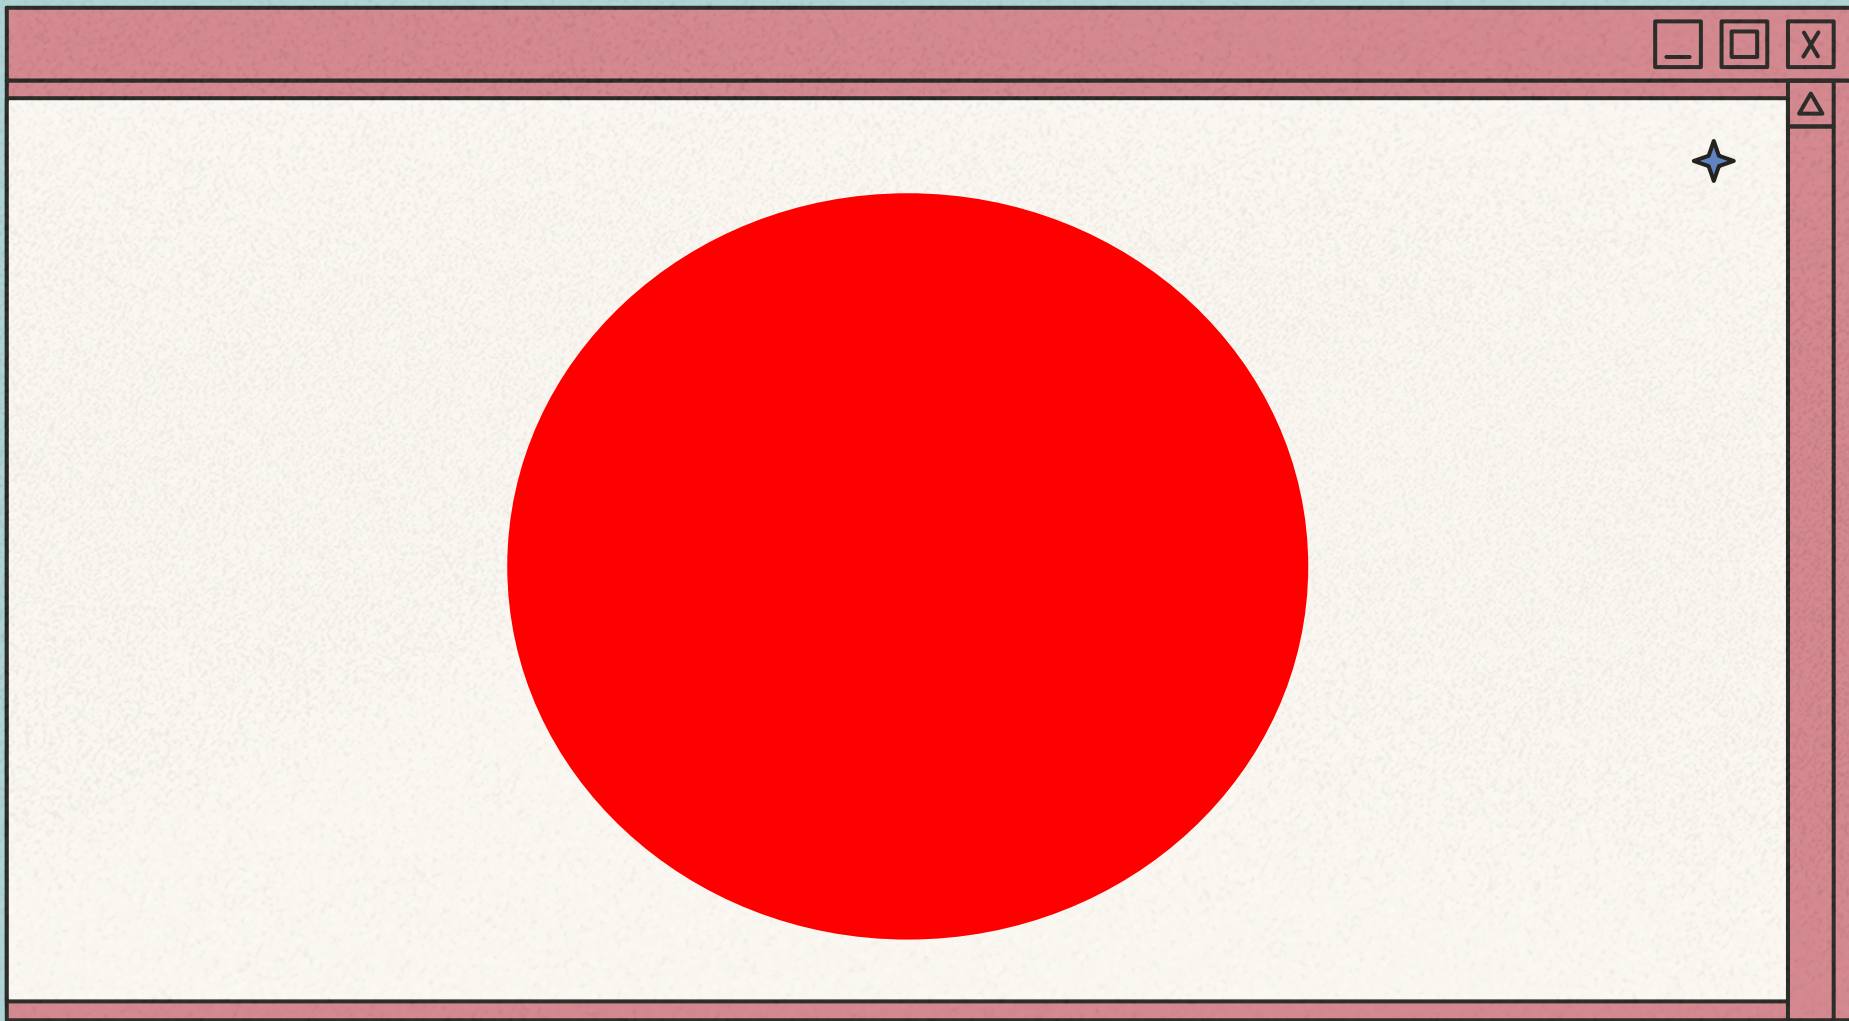

Trainings and Seminars

- ★ Teachers or organizations can use presentations to teach employees or participants about procedures, skills, or new information.

Business Use

- ★ Business proposals, sales presentations, marketing plans, project updates, financial reports and company meetings

QUESTION # 4

In Trainings and Seminars, what are the three main things teachers or organizations teach using Google Slides?

- A. Layouts, designs, and visual aids
- B. Procedures, skills, or new information
- C. Programs, schedules, and announcements
