PROMPT:
create a one page resume with the following details:

RESUME
ARYIL MARI O. NARISMA
Address: BLK 05 LT 09 Villa Constancia Subd., Catalunan Pequeño, Talomo
District, Davao City
Date of Birth: September 01, 2001
Email: amnarisma@gmail.com
Mobile: +63 960 316 4433
SUMMARY
Compassionate and detail-oriented newly graduated nurse with hands-on clinical experience in medical-surgical,
intensive care, peri-operative, and maternal-child nursing. Skilled in medication administration, patient monitoring,
airway suctioning, and basic nursing care. Collaborative and adaptable in order to provide safe, patient-centered care.
EXPERIENCE
Metro Davao Medical and Research Center, Inc. (MDMRCI) – Davao City
Nursing Leadership and Management Exposure | September 2026
- Managed medication administration for assigned patients, prioritizing accurate preparation and timely
delivery of prescribed medications.
- Coordinated patient care as a student charge nurse by monitoring assigned patients, facilitating nursing
interventions, and communicating relevant patient information to the healthcare team.
Southern Philippines Medical Center (SPMC) – Davao City
Medical-Surgical Nursing Exposure (Intensive Care Unit 4) | August 2026
- Performed aseptic airway suctioning techniques and bed bathing for critically ill patients while maintaining
comfort, safety, and infection-control practices.
- Administered intravenous medications under clinical supervision
Davao Medical School Foundation, Inc. (DMSFI) Hospital –Davao City
Peri-operative Nursing Exposure | September 2025
- Prepared and organized surgical instruments and materials to support an efficient and safe operative
procedure.
- Assisted as a Scrub Nurse during the debridement of soft tissue abscess, incision and drainage of soft tissue
abscess on the left posterior neck.
- Maintained surgical asepsis and patient safety measures throughout the peri-operative period.
Brokenshire Medical Center – Davao City
Maternal and Child Nursing Exposure (Delivery Room) | March 2025
- Executed umbilical cord care for the newborn under clinical supervision following delivery.

- Secured the umbilical cord using appropriate technique while observing newborn safety and infectionprevention measures.

Sarona Birthing Clinic – Davao City

Maternal and Child Nursing Exposure | September 2024

- Facilitated the delivery process as Handle Nurse during a normal spontaneous vaginal delivery (NSVD) under
clinical supervision.
- Provided immediate and thorough drying of the newborn within 30 seconds and initiated its early skin to skin
contact with the mother.

REFLECTION

CRITERIA	CHATGPT	CLAUDEAI
Structure	- Uses a modern, two-column layout. - Divides information into visually distinct sections. - Uses icons and decorative elements to identify different sections. - Makes the resume visually appealing but slightly more complex.	- Uses a traditional, single-column layout. - Organizes information in a clear sequence: Summary, Experience, Education, and Certifications & Skills. - Presents clinical experience chronologically. - Makes the information easier to follow and understand.
Clarity	- Visually appealing, but some information is shortened, making certain clinical responsibilities less detailed.	- Provides more complete descriptions of clinical duties and responsibilities, making the applicant's experience easier to understand.
Formatting	- Features navy-blue accents, icons, decorative elements, and varied typography for a healthcare-themed appearance.	- Uses a clean white background, simple fonts, bold headings, and thin blue divider lines for a minimalist appearance.
Overall Quality	- More visually engaging and distinctive, creating a strong first impression. However, decorative elements may slightly distract from the content.	- More formal, straightforward, and content-focused. It emphasizes professionalism, readability, and completeness.

REFLECTION

The two outputs demonstrate how different Large Language Models (LLMs) can interpret and process the same prompts but produce different results. Although both were given the same resume details and instructions, they differed in structure, clarity, formatting, and overall presentation.

Output 1 focused more on visual appeal, using a modern healthcare-themed design with navy-blue accents, icons, and a two-column layout. On the other hand, Output 2 prioritized simplicity, readability, and completeness by using a clean and organized format.

This comparison shows that each LLM has its own way of interpreting instructions and generating content. It also highlights the importance of evaluating AI-generated outputs rather than relying on them immediately. Ultimately, the best result is one that balances visual presentation, accuracy, clarity, and professionalism.
